

Accentra 52i Burn Pot Kit Part #1-00-574400

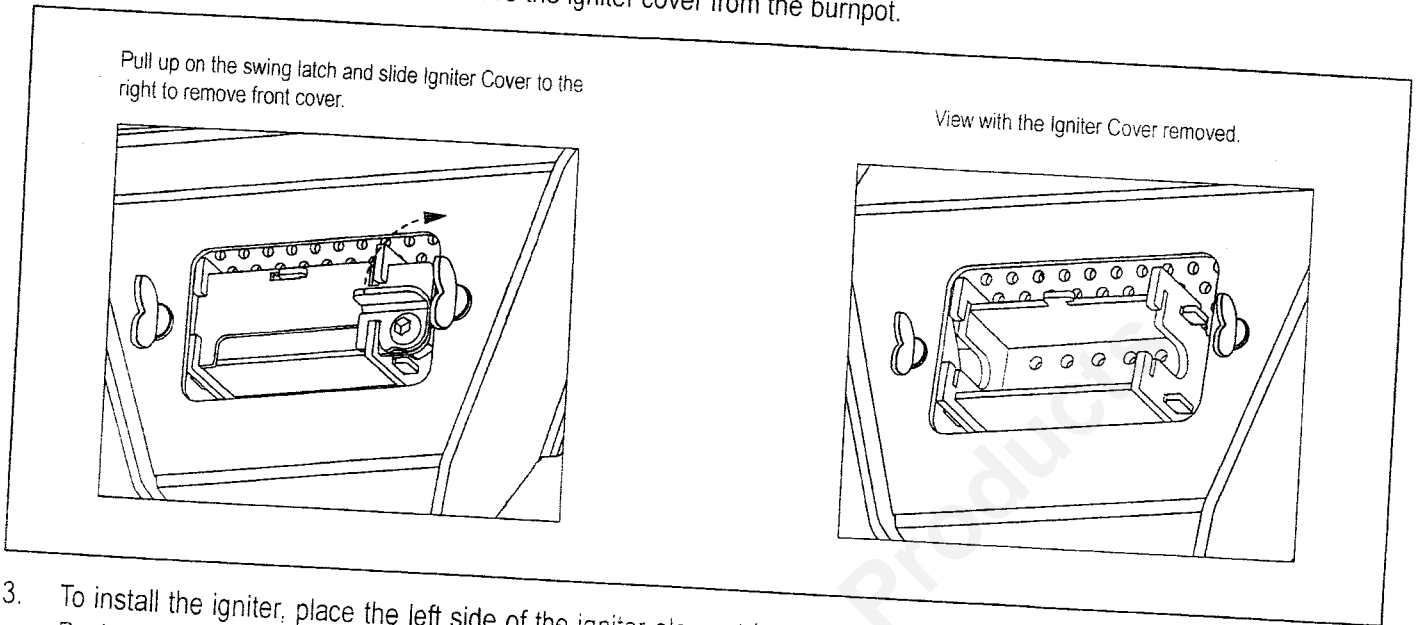

HARMAN[®]
BUILT TO A STANDARD, NOT A PRICE

Included in Kit:

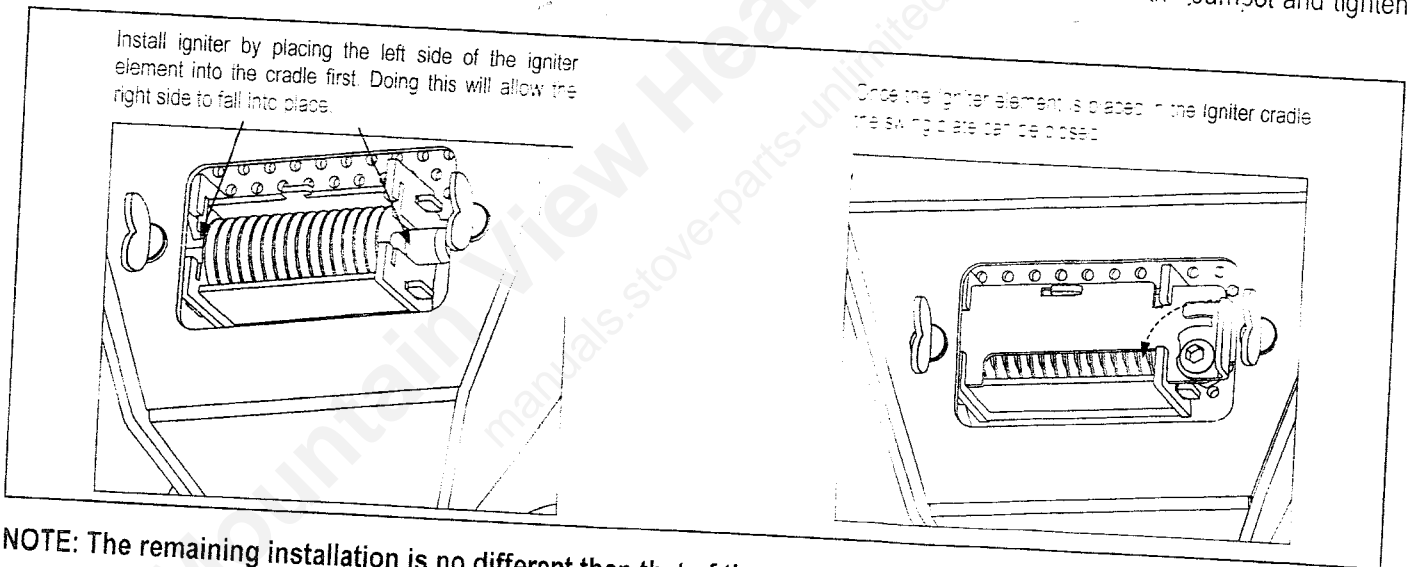

- (1) 1-10-574402 Burnpot
- (1) 2-00-574402 Igniter Cover
- (1) 2-00-06523 Cleanout Cover
- (2) 3-31-732108 1/4-20 x 5/8" Thumbscrew

1. Loosen the (2) thumbscrews and remove the cleanout cover located on the bottom of the burnpot.
2. Pull up on the swing latch and remove the igniter cover from the burnpot.

3. To install the igniter, place the left side of the igniter element into the cradle and allow the right side to fall into place. Push wires below the cradle and through the rear of the burnpot. Once the Igniter is placed into the cradle, slide the igniter cover to the left and push down on the swing latch to lock. Replace cleanout cover on the burnpot and tighten thumbscrews.

NOTE: The remaining installation is no different than that of the older style burnpot.

REMINDER: Insure the Igniter wires are pulled through to the back of the unit so the high temperature insulated wires are the only section left within the burnpot.
