

Identifying Whitfield Quest Models

Whitfield made two different versions of the Quest. The Quest, and the Quest Plus. Parts for these two units are **not cross compatible!** It is very important to determine which Quest model the customer has. The easiest way to do this is to have the customer look at the firebrick. These units take different control boards, limit switches, convection blowers, and combustion motors.

The **Quest Plus** has a rectangular hole for the pellet feed.

The Quest has an oval hole for the pellet feed.
