CAUTION

Injury Risk.

- Gloves recommended

CAUTION

Ensure appliance is completely cooled before completing this service replacement.

WARNING

Fire Risk.

Disposal of Ashes

- Ashes should be placed in metal container with tight fitting lid.
- Do not place metal container on combustible surface.
- Ashes should be retained in closed container until all cinders have thoroughly cooled.

1. After the coals have completely cooled. Remove all old brick and ash from appliance; vacuum firebox.
2. Remove new brick set from box and lay out to diagram shown in **Figure 1**.

Figure 1

3. Install bottom bricks. Lay bottom bricks in appliance (**Figure 2**).

Figure 2

4. Install rear bricks at the back of the appliance. Slide the bricks under clip on back of firebox wall and push into place (**Figure 3**).

Figure 3

5. Install side bricks. Slide top of brick under clips on side of firebox and push the bottom of the brick until it is flush with the side of the appliance (**Figure 4**).

Figure 4

CAUTION

- Ensure that the firebricks are correctly positioned
- Firebox does not contain any broken bricks prior to operating the unit.

NOTE: The firebox is lined with high quality firebrick, which has exceptional insulating properties. **DO NOT** operate appliance without the firebrick.
