

Vermont Castings/Dutchwest Handle Changes

Original style, 1-piece handle.

Revised Handle, 3-piece set up:

- Stub
- Ceramic or wood slip
- Long screw, holds slip on stub

Current Handle, stub only + Fallaway Handle:

The handle is inserted into the stub when opening and closing the doors or adjusting the damper. Then it is removed and stored elsewhere. Or you can install a handle holder on one of the leg bolts to store the handle.

Leg holder is part # 1600600.

If you are upgrading to the fallaway handle, you will need a fallaway handle and the corresponding door or damper stub.

Part #s for fallaway handles:
Ceramic - 0004342
Wood - 30004175K
